# Suntuf Installation

CONTINUE TO OVERALL DRAWING OF  
SUNTUF INSTALLATION

[CLICK HERE](#)

## Before You Begin Your Project

Make sure the color of all panels match. Be sure Panel and Horizontal Closure Strip profiles fit together... Suntuf is square. Snow, wind and weather loads should be considered when designing the slope degree of your structure. Before installation, check local building codes for relevant specifications and recommendations. Follow local codes at all times.

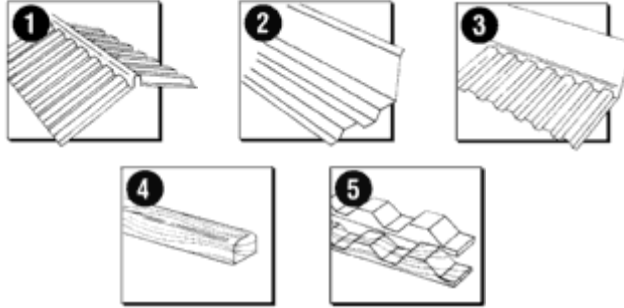

Handling And Storage: Do Not transport, leave or store panels in direct sun before or during installation. For outdoor storage, cover securely with a colored tarpaulin to avoid solar heat gain between the panels. Sunlight is magnified when passing through uncovered sheets increasing the temperature of the sheets which leads to degradation and distortion. Penetration of water between the sheets in storage will accentuate this heat gain. Therefore it is recommended to store the panels indoors. Panels will withstand heat when properly installed and ventilated. Store the panels stacked evenly on a horizontal flat surface with longer lengths on the bottom. Do not stack other items on top of panels.

## Suntuf panels support the following loads:

Pounds per Sq. Ft.	20 psf	30 psf	40 psf	50 psf
<b>Cross Support Spacing</b>	<b>36"</b>	<b>24"</b>	<b>16"</b>	<b>12"</b>

**FLEXIBLE ENOUGH FOR CURVED STRUCTURES:** Palruf panels may be used in curved applications, as long as the radius of the curve is not less than 13 feet.

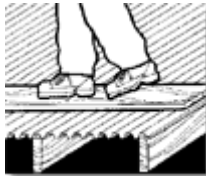

## Suntuf Accessories

1. Ridge Cap Flashing 4'2"L x 12"W
2. Side Ridge Flashing 4'2"L x 7"W
3. Wall Connector Flashing 4'2"L x 8"W
4. Vertical Closure Strips (Rigid) 7/8"x 1-3/16"W x 72"L
5. Horizontal Closure Strips (Rigid) 7/8" x 1-3/16"W x 72"L  
Horizontal Closure Strips (Foam) 7/8" x 1-3/16"W x 36"L

### **Safety**

Never walk on sheets, use a board placed across at least 3 rafters to spread the load.
