Subject : Permit Application

Please see attached permit application. This email contains the following PDF attachments...

1. Permit Application Form

- 2. Drawing 1 Residence before proposed work
- 3. Drawing 2 Patio roof dimensions and location
- 4. Drawing 3a Side view without dimensions
- 5. Drawing 3b Side view with dimensions
- 6. Drawing 4 Post, beam, and rafter details
- 7. Suntuf Panels roofing material overview

Please let me know if you require any additional information. Thanks. Also, please let me know at what points you will need to inspect the work (for example, after the post holes are dug, but before concrete is poured?).

Regards,

Kevin Carroll 658 Cloverdale Ave

Attention Richard Lohbeck:

Thanks for your review of my permit application. I hope it is okay to email the files versus sending hard copies. I am including PDF attachments again addressing your revision/supplemental information requests...

1. "Submit site plan showing distance to property lines."

This was attached previously as "Drawing 2". I have edited the document with some corrections/clarifications. First, I corrected the misspelling of "North". Second, I added red lines to clarify the beginning and end of the dimension lines. Finally, I changed the color of the dimension text to make it more obvious. Please let me know if it was missing any details.

2. "Submit floor plan showing posts with dimensions."

All posts are 6" x 6" and are 12' from the house on 8' or 10' spacing. The only 4x4s used are the 12" spacers. Both can be seen in "Drawing 3". I have included an additional drawing showing the detailed "floor plan". It is attached as "Drawing 5".

3. "Submit detail showing connection to house."

The top panel of siding under the gutter will be removed. A 2" x 8" ledger/ridge board will be attached in its place using lag bolts. Suntuf Wall Connectors will be used for head flashing at the wall (see "Roofing Material Info 3b"). I have also attached a new drawing from the front showing the ledger/rafter details ("Drawing 6").

4. "Indicate purlin size and spacing per manufacturer's specs."

The mfr's installation instructions show  $5/4" \ge 3"$  purlins at 36" o.c., but I plan to use aternating 2"  $\ge 2"$  treated furring strips and 2"  $\ge 4"$  upright treated boards at 24" o.c. This will provide additional strength across the double 2x8 rafters, which are 48" o.c. vs the 24" o.c. shown in the mfr's installation instructions. I have created and attached an additional drawing to show this detail. It is "Drawing 7".

Attachment Summary
1. Drawing 2 - Patio roof dimensions and location (revised)
2. Drawing 3b - Side view with dimensions (revised)
3. Drawing 5 - "Floor Plan" (new)
4. Drawing 6 - Ledger, Post, and beam details (new)
5. Drawing 7 - Roofing panel installation details (new)
6. Roofing Material 3b - Suntuf Panels head flashing detail (new)
Please let me know if you require any additional information. Thanks again.

Mr. Kevin Carroll 658 Cloverdale Avenue Springdale OH 45246

Permit Application – 658 Cloverdale Avenue, Springdale OH Re: Request for Revisions

Dear Mr. Carroll:

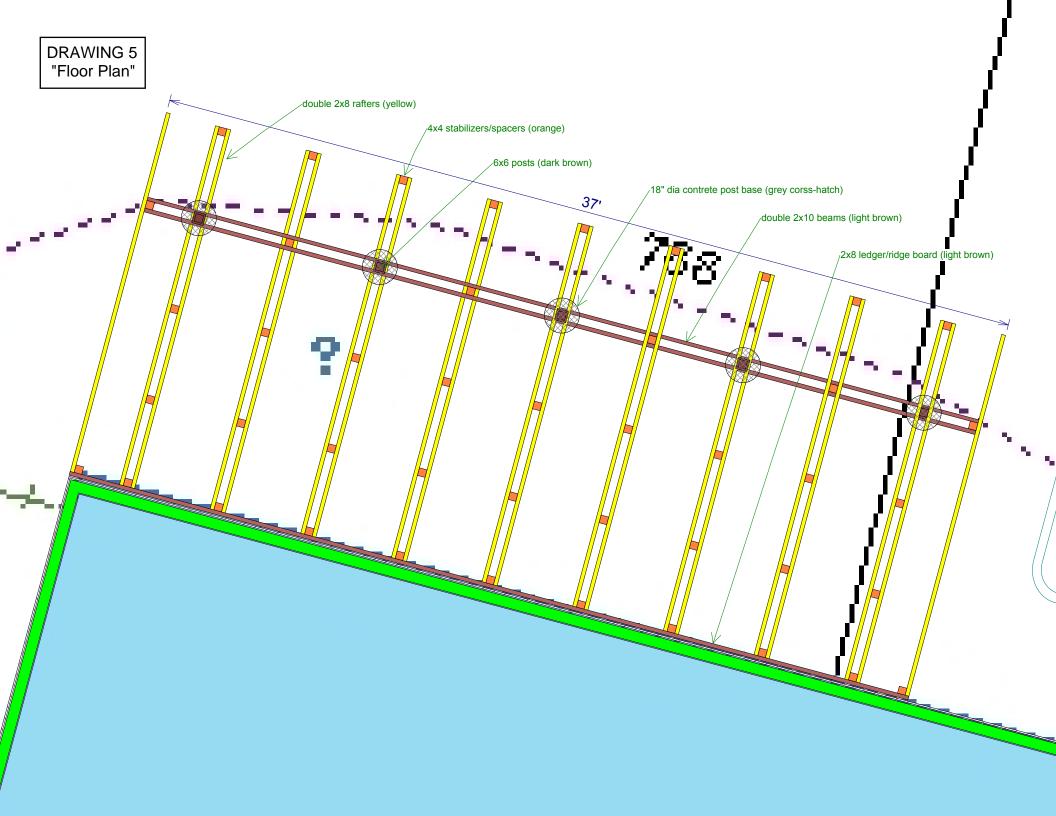

Your application for permit is being withheld pending receipt of the following revisions:

- 1. Submit site plan showing distance to property lines.
- 2. Submit floor plan showing posts with dimensions.
- 3. Submit detail showing connection to house.
- 4. Indicate purlin size and spacing per manufacturer's specs. (See enclosed sheet).

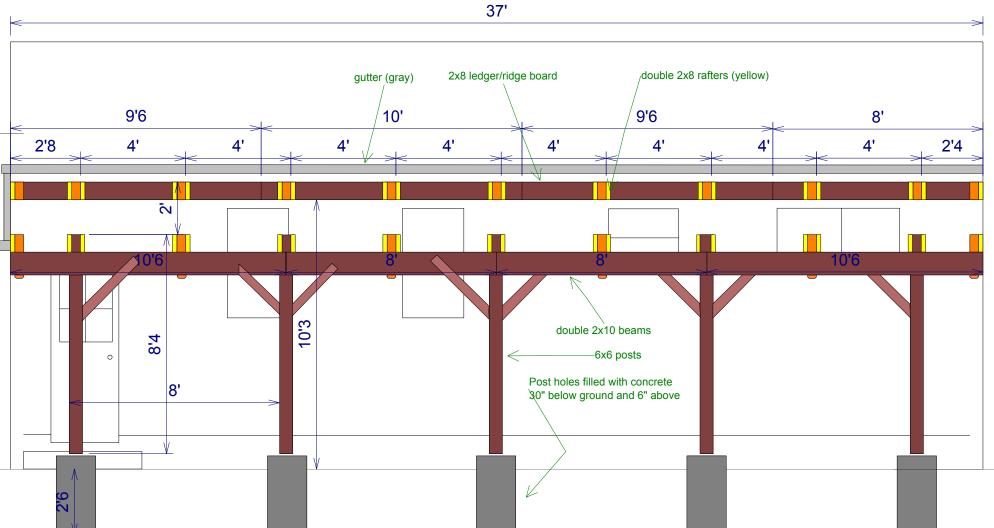

Upon receipt of three copies of revised drawings we will continue processing your application. If you have any questions please don't hesitate to call.

Sincerely, Ruberd Johbert

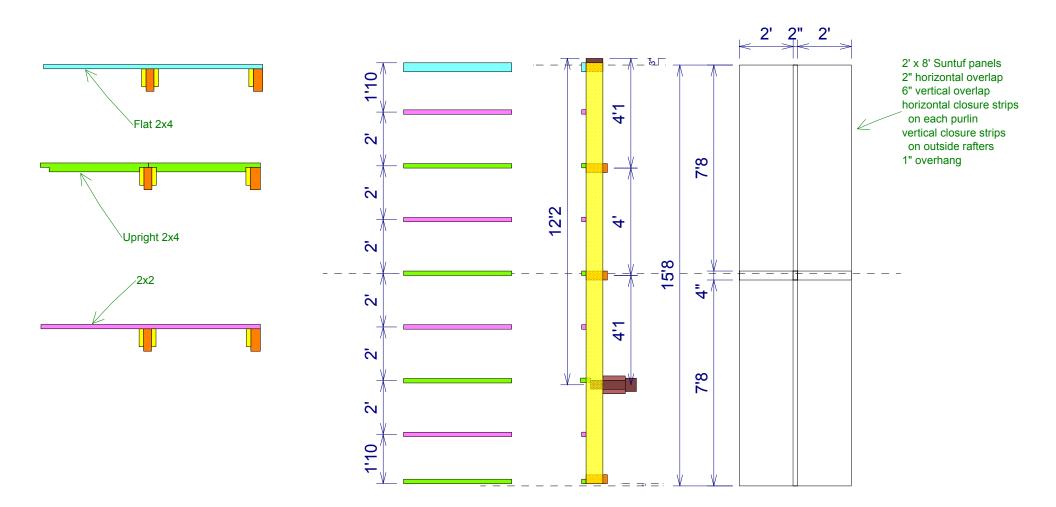

Richard G. Lohbeck Inspections Supervisor

ARCHITECT None OR ENGINEER

CONTRACTOR Owner

Where electrical equipment or wiring is installed, an application for electrical inspection by the Inspection Bureau Inc. is required in compliance with the Building Code. Approval must be obtained before any wiring is concealed. Separate permits must be obtained for mechanical systems, fire protection systems, signs, elevator conveyor equipment, plumbing and street openings.

All work to be done in compliance with the ordinances pertaining to same and the plans or application, etc. as approved by the Building Department.
